"A bad Handwriting is as annoying to a reader, as an irritating voice to a listener. Unless children learn to write legibly and at speed, their education achievements may be reduced and their self esteem affected."

-Rhona Stainhorp
(Prof. University of London)

DID YOU KNOW ?

- Every third school going child has a problem in Handwriting.
- Those who write slow, have inadequate mind and motor coordination.
- Handwriting is also called Brain writing.
- Slow and illegible writers generally make more mistakes in spellings than those who write fast.
- According to Wall Street Journal, 'Retaining and remembering information is better in writing by hand'.
- Handwriting is like fingerprints. No two people can write similar.
- Handwriting is the mirror of the writer's mind-set.
- January 23 rd is celebrated as the National Handwriting Day every year.

Student's Speak

An advertisement of Write Right said "Improve your Handwriting in just 7 days with 100% guarantee". I took the challenge, and they proved to be right. I owe my beautiful Handwriting to Write Right.

Ruchi Jain, Age : 18

I was not very happy about my Handwriting and it was somewhere affecting my career. But now this is no more an issue, after my training with Write Right for 7 days.

Vinay Chowdhary, Age : 24

After joining Write Right, my marks in all the subjects have increased and my teacher is now very fond of me.

Sarthak Agarwal, Age : 13
